EDUCATION

University of California - Irvine

B.S. in Computer Science, Specialization in Intelligent Systems

GPA: 3.948/4.0

Sep. 2023 – June 2027

Irvine, CA

EXPERIENCE

UC Irvine

Artificial Intelligence Research Assistant

Apr. 2025 – Present

Irvine, CA

- Researching under UC Irvine professor Roy Fox on gradient estimators and control variates
- Contributed PyTorch code to the Clowder library, extending functionality for stochastic optimization

Microsoft

Software Engineer Intern

June 2025 – Sep. 2025

Redmond, WA

- Developed thermal throttling functionality for Surface camera drivers to optimize performance under AI workloads
- Built an automated pipeline for camera sensor validation, cutting testing time by 27%
- Optimized HLK workflows, reducing smoke test runtime from days to under an hour

Calit2

Software Developer

Sep. 2023 – April 2025

Irvine, CA

- Implemented a real-time video analysis service for detection, tracking, and pose estimation
- Built a streaming pipeline with Kafka for real-time processing and MongoDB for result storage
- Simulated thermal energy storage systems by generating synthetic time-series data
- Trained regression models to predict temperature evolution, improving forecasting accuracy

PROJECTS

Art Recommender | Python, PyTorch, FAISS, FastAPI

Sep. 2025 – Present

- Trained an MMD-VAE to encode CLIP embeddings of artwork into a latent space
- Used max-entropy sampling for active learning and FAISS-based retrieval for max-likelihood recommendations
- Deployed an interactive swipe-based interface, enabling user-driven preference learning

ZotNFound | Next.js, Express.js, AWS, SST, Firebase

Nov. 2023 – Present

- Launched a lost-and-found web app serving 2,000+ UC Irvine students
- Migrated backend from Firebase to AWS with SST, improving scalability and maintainability

Face Generation | Python, PyTorch

May 2025 – June 2025

- Trained a VAE with a structured latent space on the CelebA dataset
- Trained a conditional latent diffusion model to generate faces given specified attributes

UCI CubeSat | C++, Docker

Mar. 2024 – Mar. 2025

- Developed embedded software in C++ and Docker for a 2U nanosatellite payload mission
- Led onboarding and task management for new software team members

UCI Search Engine | Python, Apache Spark, Flask

Nov. 2024 – Dec. 2024

- Developed a multithreaded web crawler for the UCI directory, storing and indexing collected pages
- Created a search engine with TF-IDF relevance ranking and PageRank scoring
- Accelerated indexing with Apache Spark and built a Flask web interface for search

TECHNICAL SKILLS

Languages: Python, C, C++, CUDA, R, Rust, SQL, HTML, CSS, JavaScript, TypeScript

Frameworks: React, Node.js, Flask, FastAPI, Apache Spark, Apache Kafka

Developer Tools: Git, Docker, Azure DevOps, AWS, PostgreSQL, MongoDB, Vercel

Libraries: PyTorch, Pandas, NumPy, SciPy, OpenCV, Scikit-learn, Synthetic Data Vault, Ultralytics
